

Problem Set 1

BDML

This website contains the relevant data for the first problem set for Big Data and Machine Learning for Applied Economists.

The data was partitioned in 10 chunks and contains 32,177 observations coming from the 2018 GEIH (https://microdatos.dane.gov.co/index.php/catalog/547/get_microdata). The data contains the original variables and constructed variables (I want to thank Prof. Manuel Fernández Sierra (<https://sites.google.com/view/manuelfernandezsierra>) for kindly providing the codes to construct these variables)

The data dictionary is available here ([dictionary.html](#)). A document with the DANE's description is available here ([ddi-documentation-spanish-608.pdf](#))

For some levels and labels refer to the following link: labels ([labels.html](#))

You can access the data following these links (it may take a little bit to load):

- Data chunk 1 ([page1.html](#))
- Data chunk 2 ([page2.html](#))
- Data chunk 3 ([page3.html](#))
- Data chunk 4 ([page4.html](#))
- Data chunk 5 ([page5.html](#))
- Data chunk 6 ([page6.html](#))
- Data chunk 7 ([page7.html](#))
- Data chunk 8 ([page8.html](#))
- Data chunk 9 ([page9.html](#))
- Data chunk 10 ([page10.html](#))
